***Continued Examination Under 37 CFR 1.114***

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on 4/2/2007 has been entered.

***Allowable Subject Matter***

Claims 1 – 16 are still allowed. The prior art of record fail to teach a method of and a system for controlling a lighting apparatus in a vehicle traveling on a road as a function of the geometry of the road comprising, among other limitations, comparing, after an initial testing is completed regarding the reliability rate of a navigation data versus the reliability threshold value, to ensure consistency between control commands formulated with respect to information provided by vehicular sensors versus control commands formulated from navigation information; and further comparing confidence level for the navigation information, comparing the confidence level with a previously determined confidence threshold; if the confidence level is lower than the confidence threshold, applying the first lighting command to the lighting device; and if the confidence level is higher than the confidence threshold, determining a second lighting command based on the navigation information; comparing the said first and second

commands; applying the second lighting command to the lighting device when a difference between the first and the second commands is lower than a predetermined threshold; and applying the first lighting command to the lighting device when a difference between the said first and second lighting commands is higher than a predetermined threshold.
